Loqate, A GBG Solution
Release Notes – Verify API
2021Q1.0 Major Release

Case Resolutions

Please visit http://support.loqate.com/2021Q1-0-resolved-cases/ for a list of cases resolved in this release. If you would like more details on any of the solved cases listed, please contact support@loqate.com for further information.

Supported Platforms

AIX 6.1 Platform Retirement

The platform AIX 6.1 has reached the end of life and will no longer be supported in all future Loqate releases. For additional information on the retirement of platforms for this release, please visit the support site here. To view a full list of the supported platforms please see the release information page here and select the 'Supported Platforms' link for the release required. Please contact your account manager if you have further questions.

zLinux Delay

Please note the zLinux build has been delayed for the 2021Q1.0 release. Please contact your account manager for further questions and if you need to be notified when it's ready to download.

Legacy Platforms Delay

Please contact the support team: support@loqate.com for additional information on obtaining installers and libraries for the following 2021Q1.0 platforms: HPUX, Solaris, and Sparc.

Local API Improvements

Search Response Times
Some users may have experienced a delay in processing results through Search when using parenthesis as part of the input Address1 field; this is resolved with the 2021Q1.0 major release.

OutputScript Server Option Improvement
When using the option OutputScript=Latn with the Korea Dataset, unexpected transliteration results may have been returned within the SubBuilding field; this is resolved with this release.

SubBuilding & Premise Fields
When using the USA Dataset, users may have seen SubBuilding and Premise fields transposing in the result. This is now resolved, and the correct values will now return.

Address Formatting
In the USA Dataset, the following fields: SubBuilding, Premise, and Building fields will now return the expected values when parsed.

Parenthesis are now included in the SubBuilding field within the USA Dataset.

Installation Instructions

Please remember to update both the program files and the reference data. The improvements are tied to the data in the Global Knowledge Repository and the Local API. If you need any assistance with the upgrade of the Local API or the data update process, please contact GBG Loqate Support.

The setup wizard for the Local API can be obtained from our SFTP server. Please contact your account manager to retrieve the SFTP information. If you do not know who your account manager is, please contact the support team at support@loqate.com.
