Certification Data Expiration Dates

If you have purchased a certification product, please be aware that some of the datasets have expiration dates set by the respective postal authorities. Please ensure that you have the latest library and data installed to avoid loss of service through these products.

Please check Install Manager for the latest versions of our certification data	Loqate Release Date	Certification Expiry Date*
AMAS Data	2023-09-19	2023-12-31
CASS2 Data	2023-11-01	2024-01-31
SERP	2023-10-03	No Expiry

For more information on expiry date checking for CASS and AMAS, please refer “Usage expiration” section in <https://support.loqate.com/documentation/local-apis/cass-overview-2/> and <https://support.loqate.com/address-matching-approval-system-amas/>

For SERP there is no forced expiry in the data it just becomes less current the longer you leave it between updates.

Please check using Install Manager to get the latest versions of our certification data.

Download Instructions

Getting new data only.

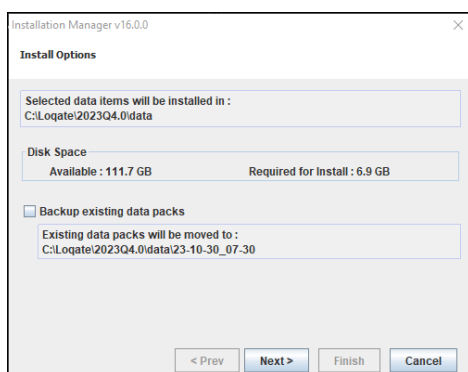

1. Run InstallManager.bat / InstallManager.sh in **current API** folder.

2. If the Install Manager is set to point to **existing** /data directory, it will detect and download only newer versions of country data allowed by your license key.

- a. This can work across multiple data releases, for example if you have not updated data for two data releases, Install Manager will download all data updated in both releases.
- b. **Important:** When pointing to an existing install, Install Manager will overwrite existing data files with new ones. We strongly recommend backing up existing data by selecting 'Y' when Install Manager prompts 'Backup existing data packs'.

Getting all country data.

1. Run InstallManager.bat / InstallManager.sh in **current API** folder.
2. Point the Install Manager to a **new and empty** /data folder. This will force Install Manager to download all latest available data for all countries allowed by your license key.
3. Ensure to configure your API to point to the new /data folder to ensure it is using latest reference data.
