Country Specific Change

Country	ISO2	Description
Saudi Arabia	SA	Parsing Handling of SecondaryNumber in Address Format

Saudi Arabia

In Saudi Arabia, addresses often include a **secondary number**, which is crucial for accurate location identification. Previously, our engine did not recognize this information. This release includes an improvement to correctly parse this information into a new field called "SecondaryNumber."

RRRD2929 — Short Address

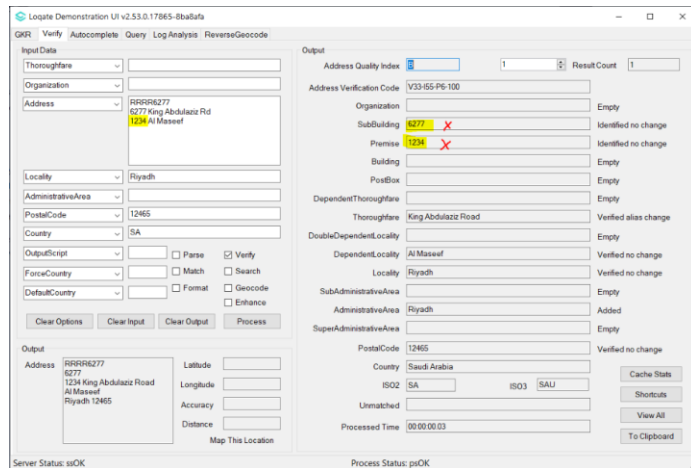

Building # (4 distinctive numbers representing a building) — 2929, Raihana Bint Zaid — Street (Represents the location of the main entrance of the building)

Secondary # (4 numbers representing the accurate location coordinates; beneficial when there's no street or district names) — 8118, AlArid — District (Represents the district where the building is located in)

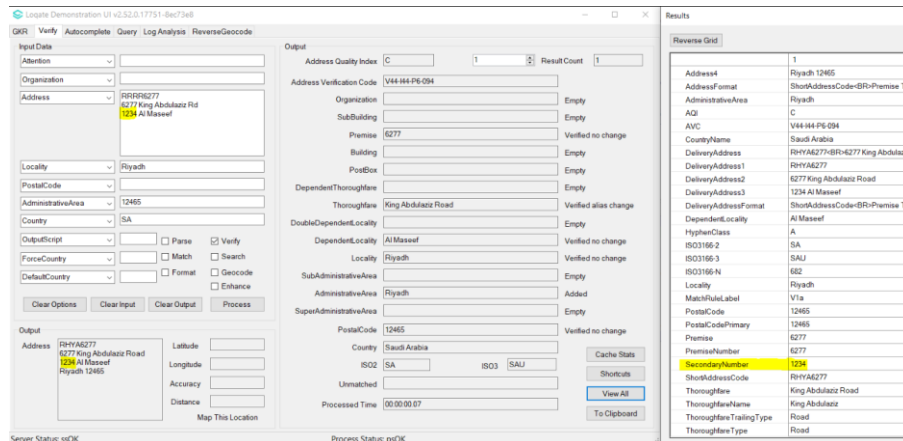

13337 — Postal Code (5 numbers, each digit has a significant location; postal code network covers 100% of Saudi Arabia)

City (The city where National Address is located in) — Riyadh
