Details of Country Rebuilds / Major Improvements

ID - Indonesia

As part of our onboarding new supplier data for Indonesia we have added in a **New Field** - 'Cluster' that will improve address verification for Indonesia in our Verify Product.

This field refers to a residential grouping commonly used in Indonesian addresses, similar to neighbourhood or resident association information. It helps identify specific housing areas within larger communities and represents local administrative divisions commonly known as *RT (Rukun Tetangga)* and *RW (Rukun Warga)*.

For Indonesia, the format for '**Cluster**' is typically:

RT. {NUMERIC}/RW. {NUMERIC}

Example: *RT. 8/RW. 9*
